Sample Practice Question

Question:

Which of the following is a priority nursing intervention for a patient with a urinary tract infection (UTI)?

Options:

- a. Administer antibiotics
- b. Encourage fluid intake
- c. Apply heat to the lower abdomen
- d. Monitor urine output

Rationale:

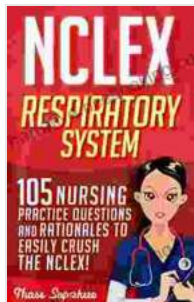

Encouraging fluid intake is a priority nursing intervention for a patient with a UTI. Adequate fluid intake helps flush bacteria from the urinary tract and promotes urination, reducing the risk of infection progression.
