Hayes defines ignorance as "a lack of knowledge or education." He argues that ignorance is not simply a matter of not knowing something, but also of being unwilling to learn. He writes, "Ignorance is not just a lack of knowledge, but a lack of curiosity. It is a refusal to learn, to grow, to change."

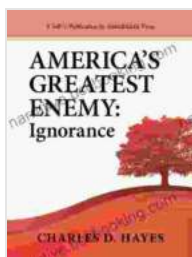

Hayes provides a number of examples of how ignorance has damaged our country. He points to the fact that the United States has one of the highest rates of poverty in the developed world. He also notes that the United States is one of the most violent countries in the world. Hayes argues that

these problems are due, in part, to the fact that many Americans are ignorant about the causes of poverty and crime.

Hayes also argues that ignorance is at the root of racism and sexism. He writes, "Racism and sexism are based on the belief that one group of people is superior to another. This belief is often based on ignorance about the history and culture of other groups." Hayes argues that we need to educate ourselves about the history of racism and sexism in Free Download to overcome these prejudices.

Hayes concludes his book with a call to action. He writes, "We need to educate ourselves and our children. We need to work to create a more just and equitable society." Hayes believes that if we can overcome our ignorance, we can create a better future for our country.

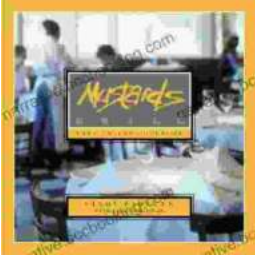

America's Greatest Enemy: Ignorance is a must-read for anyone concerned about the future of our country. Hayes provides a powerful call to action for us to educate ourselves and our children, and to work to create a more just and equitable society.
