

# Issues In International Trade Theory

## A Comprehensive Guide

International trade is one of the most important engines of economic growth in the world today. It allows countries to specialize in producing goods and services that they can produce most efficiently, and to trade with other countries for goods and services that they cannot produce themselves. This specialization and trade leads to increased production, lower prices, and a wider variety of goods and services for consumers.

## Floating World, The: Issues In International Trade Theory (World Scientific Studies in International Economics Book 35) by Cathy Lamb
